

Teamwork Contract

Team Name:	The Best Team	TIPS FOR EFFECTIVE TEAMWORK • Complete your Teamwork Contract at your first team meeting. • Set agendas for meetings. • Ensure clarity on your action items, timelines, deliverables, and project milestones. • Check in with your team members. • Ask questions, especially if something is unclear to you. Seek to understand. • Ask for input from your colleagues and build on each other's ideas. • Structure team meetings so that everyone has a chance to speak and participate.
Team Number:	Group 29	
Course and Section Number:	Machine Learning 1 CSCI 3052U	
☐ Has your team completed the Team Skills Audit form? (See below.)		
SECTION A – EXPECTATIONS, BEHAVIOURS, GROUND RULES		
Have an open, direct conversation about the kinds of expectations and behaviours that will help your team work effectively. Use the questions below as a guide to start your team discussion. To ensure a productive discussion, think about these questions in advance. You might want to practice conversation management techniques or structure your conversation using Post-It notes / a shared document to allow team members to write down their opinions. ▪ What values are important to you as a team? ▪ What grade are you aiming for as a team? How will you help each other achieve this? ▪ How will you communicate and how often? How responsive must team members be? What communication platform will you use? ▪ How will you meet as a team (in person, virtually)? How often will you schedule meetings? ▪ How will you manage file or data sharing? Which platform will you use? ▪ If a group member can't meet a deadline due to unforeseen circumstances, what should they do? ▪ What do you consider to be "late" for meetings or for internal draft submission deadlines? ▪ What will you do if you are unhappy with the quality of work produced by the team or by an individual team member?		

- How will you handle conflict or confrontation? Will you deal with it in the moment, or do you need space and time to reflect? If team conflict or disagreement arises, how will you address it? (Consider your personal communication style and preferences and share with your group.)
- How will you provide constructive feedback to each other? (Consider what you need from your teammates when it comes to feedback and share with your team.)

Questions adapted from Barkley et al. (2014)

Use this discussion and the column on the right below to create your team's ground rules.

Example ground rules

OUR TEAM'S GROUND RULES

- Carefully read and review content from all team members to ensure familiarity with the full assignment submission.
- Meet deadlines the team has agreed on.
- Provide 48-hour notice for any changes to group meetings.

Communication and sharing information:

Discord as main communication platform

Meetings and deadlines:

Weekly meeting every Wednesday at 4 pm. Aim to have personal objectives and goals completed by 3-5 days before hard course deadline.

Work distribution and quality:

Work will be distributed equally between all 5 members of the team and will be peer-reviewed to check for quality.

Feedback:

Members will be asked to provide their opinion on any developments or challenges the group will encounter. This will then be reviewed and actioned by the group.

Miscommunications or incomplete work:

Any miscommunications or incomplete work should be addressed in a timely manner to the rest of the group, with timelines depending on the urgency of the task. If any member is not communicating with the group after multiple requests, the issue will be escalated to the professor.

Other:

SECTION B – PROJECT PLAN

When you decide on team roles, consider rotating roles for each task or stage of the project. This gives all team members a chance to develop a well-rounded skill set. Common roles might include facilitator, editor, data manager, coordinator, but you can decide on your own roles based on group strengths and the goals of the assignment.

Team Member	Principal Roles
Himmat	project coordinator
Jay	Communication Lead
Abijit	Data Lead
Akash	Modelling lead
Tabish	evaluation/reproducibility lead,

Notes on Team Roles (E.g., Will you rotate roles? Define any roles that are unclear above.)

Yes we will be rotating roles

TASK ASSIGNMENT		Final Deliverable Due: [Date]	
Task	Steps Involved in Task	Task Deadline	Team Meeting Date
Dataset & Problem Approval	Select dataset, perform EDA, define target, data split, evaluation metric, and risks.	10/02/2026	9/30/2026
Baseline Reproduction	Build data pipeline, implement naive and ML baselines, and document reproducible results.	10/19/2026	10/14/2026
Review and improve	Review methods/results, identify blockers, update timeline, and prepare progress presentation.	10/30/2026	10/28/2026
Final Experiments & Analysis	Train and compare models, tune parameters, analyze errors/robustness, and draft conclusions.	11/20/2026	11/18/2026
Final Report & Presentation	Finalize results, report, repository, presentation/demo, and contribution documentation.	12/04/2026	12/02/2026
Individual Reflection and Oral Defence	Reflect on individual contributions	12/07/2026	12/02/2026

Notes on Project Management and Task / Work Plan:

SECTION C – SIGN OFF

By writing your name and student number below, each of you indicates that you agree and commit to the plan developed and ground rules contained in this Team Contract.

If you do not agree with the terms above, do not sign the contract. Instead, bring up your concerns with your team. You can also contact a Teamwork Mentor by sending an email through the course slack. Teamwork Mentors can help you and your team develop ground rules and a plan of action you can all agree to.
